

MAX HOUSE
OKHLA

Open for business; In the heart of New Delhi

Originally the headquarters of the \$3B Max Group, Max House is located at the epicenter of the Secondary Business District of Delhi. Offering ~105,000 sq. ft. of prime real estate spread across 10 floors, Max House is poised to be the new business address in Delhi NCR.

Designed to address the future of work while considering human capital to be an occupier's most important resource, Max House blends thoughtful design and superior hospitality in order to nurture a more productive, healthier and happier community.

WorkWell

If that sounds like a mantra, it's because it is one!

To us, it stands for a lifestyle where learning is looked at as a continuous process which is influenced and reinforced by company culture, combined with human-centric design to form a modern workspace.

In Max House, the "**WorkWell**" philosophy has been adapted by us based on **The Well Standard** which entails the following:

Air – Focus on features such as ventilation, monitoring of CO2 levels, filtration and pest control enables us to provide optimal indoor air quality to support the health and well-being of our occupants.

Water – An intelligent water harvesting and recycling strategy enables us to provide safe and clean water, while lowering our impact on the environment.

Nourishment – By providing fresh and well sourced food options to our tenants, Max House aims to promote wellness in consumption we through initiatives such as organic vegetable sales, etc.

Light – The design of Max House has been built around sun tracking, focusing on features such as controlling glare, yet enabling daylight. Our intent is to minimise the use of artificial lighting, while promoting alertness and energy of our tenants.

Fitness – Max House aims to promote movement which has informed our design features, be it the long walks from the coffee shops to the lobby, with large landscaped gardens, or designing the stairwells in a way to make them beautiful and an enjoyable experience to use.

Comfort – Accessibility, ergonomics, acoustics and thermal considerations have been optimised to make Max House a distraction-free, productive and comfortable space.

Mind – Incorporating features such as biophilia, beauty and design, promotion of wellness, Max House provides a physical environment that optimizes cognitive and emotional health.

Max House is a culmination of all these elements with an intention to increase the productivity, creativity and well-being of our tenants. "Work" and "Life" have stopped being two distinct halves of our culture. Instead, all of our lives are informed by how we work and our work is informed by how we live. Essentially, we envision Max House to be an environment built around enhancing and enriching your work and your life, allowing you to truly **WorkWell**."

Max House is an attempt to provide you with

- an iconic address providing excellent visibility and presence
- collaborative and flexible multi-use spaces that allow you to retain your space efficiency
- “Pulse” offerings that create experiences for occupants to reinforce the values of innovation, collaboration and inspiration, enabling on-site continuous learning around the workforce needs of today and tomorrow
- the workplace as a strategic asset and a catalyst for cultural change

P U L S E

Design that is Iconic & Sublime

Designed meticulously to be highly functional while being aesthetically pleasing. The unique façade, made of terracotta bricks, showcases the rich industrial history of Okhla. The iconic clock tower on the South-West side of the building makes Max House an unmissable address.

As a result, the workspace we offer our tenants acts as an area of advantage for retention, recruitment, development and well-being. Hence, we wanted to re-think the workspace to not only be a real estate asset but a strategic asset for our tenants.

Lobby of Max House

Simply Superior Materials & Construction

The materials used to build each space have been carefully chosen to maintain a sense of luxury and balancing it with our high sustainability design standards. From unique glass bricks to terracotta brick tiles, everything at Max House has been hand-picked to ensure a sense of luxury, comfort and longevity.

The common areas of Max House are well appointed with:

- A combination of brick and marble which exude a sense of welcome and warmth
- Double glazed windows to lower operating costs while allowing light transmission
- Wooden wall finish & panelling
- High ceilings with a height of 3.75 meters
- Efficient floor plates with a clean, efficient rectangular design
- Plants and nature wherever you look

Spaces

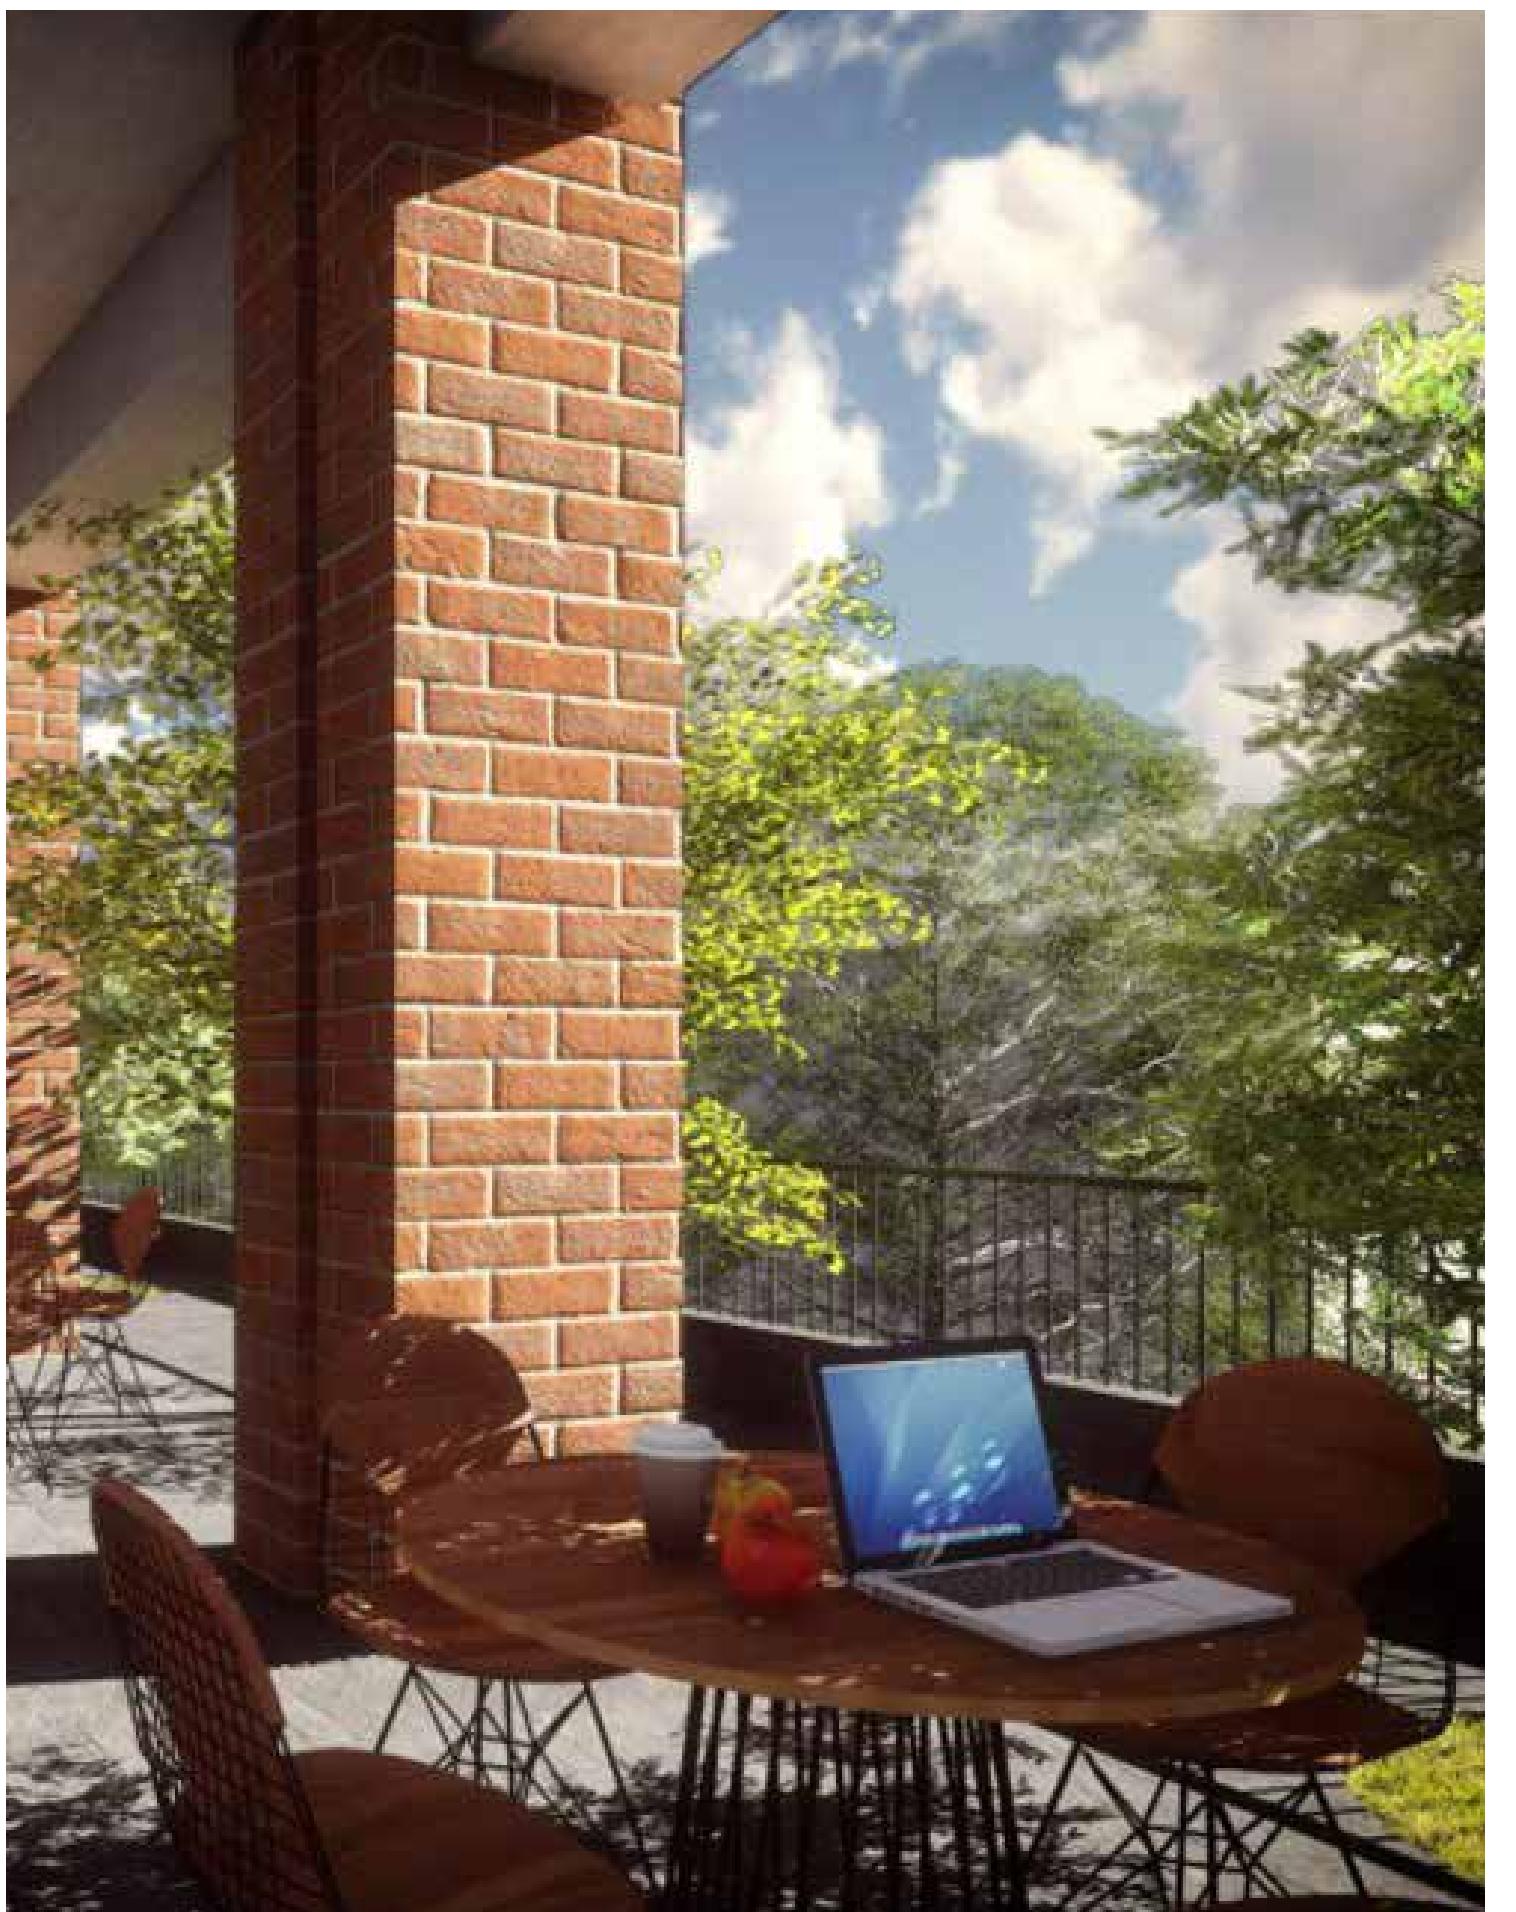

"Space is the body language of an organization"

Max House will provide accessible and multifunctional spaces that are both indoors and outdoors, including various decompression zones for people to relax and meditate.

The tenant floors have a clean rectangular floor plate, with the lift core being on one side the building. Designed such that 90% of regular occupied space gets direct line-of-sight to the outside environment, the design enables the ability to flexibly to have multiple tenants on a floor, without compromising the tenant experience.

Sustainability: LEED Gold Certified

"Ultimately, we are responsible for building the future we want."

Max House is designed to be LEED Gold certified.

Max House is a thought leader in sustainability and aims to minimise its ecological footprint. To do so is important to us because we feel a certain responsibility towards our planet, and we invite you to share our enthusiasm for the same. The LEED Gold certification is a validation of our efforts and helps cement our belief that ecology, biophilia, commerce and real estate can co-exist at a single, iconic address.

Holderstebolder at Max Towers, Noida

The philosophy of biophilia runs deep throughout the developments of Max Estates

The natural world has inspired not just poets and philosophers through human history, but also scientists and entrepreneurs.

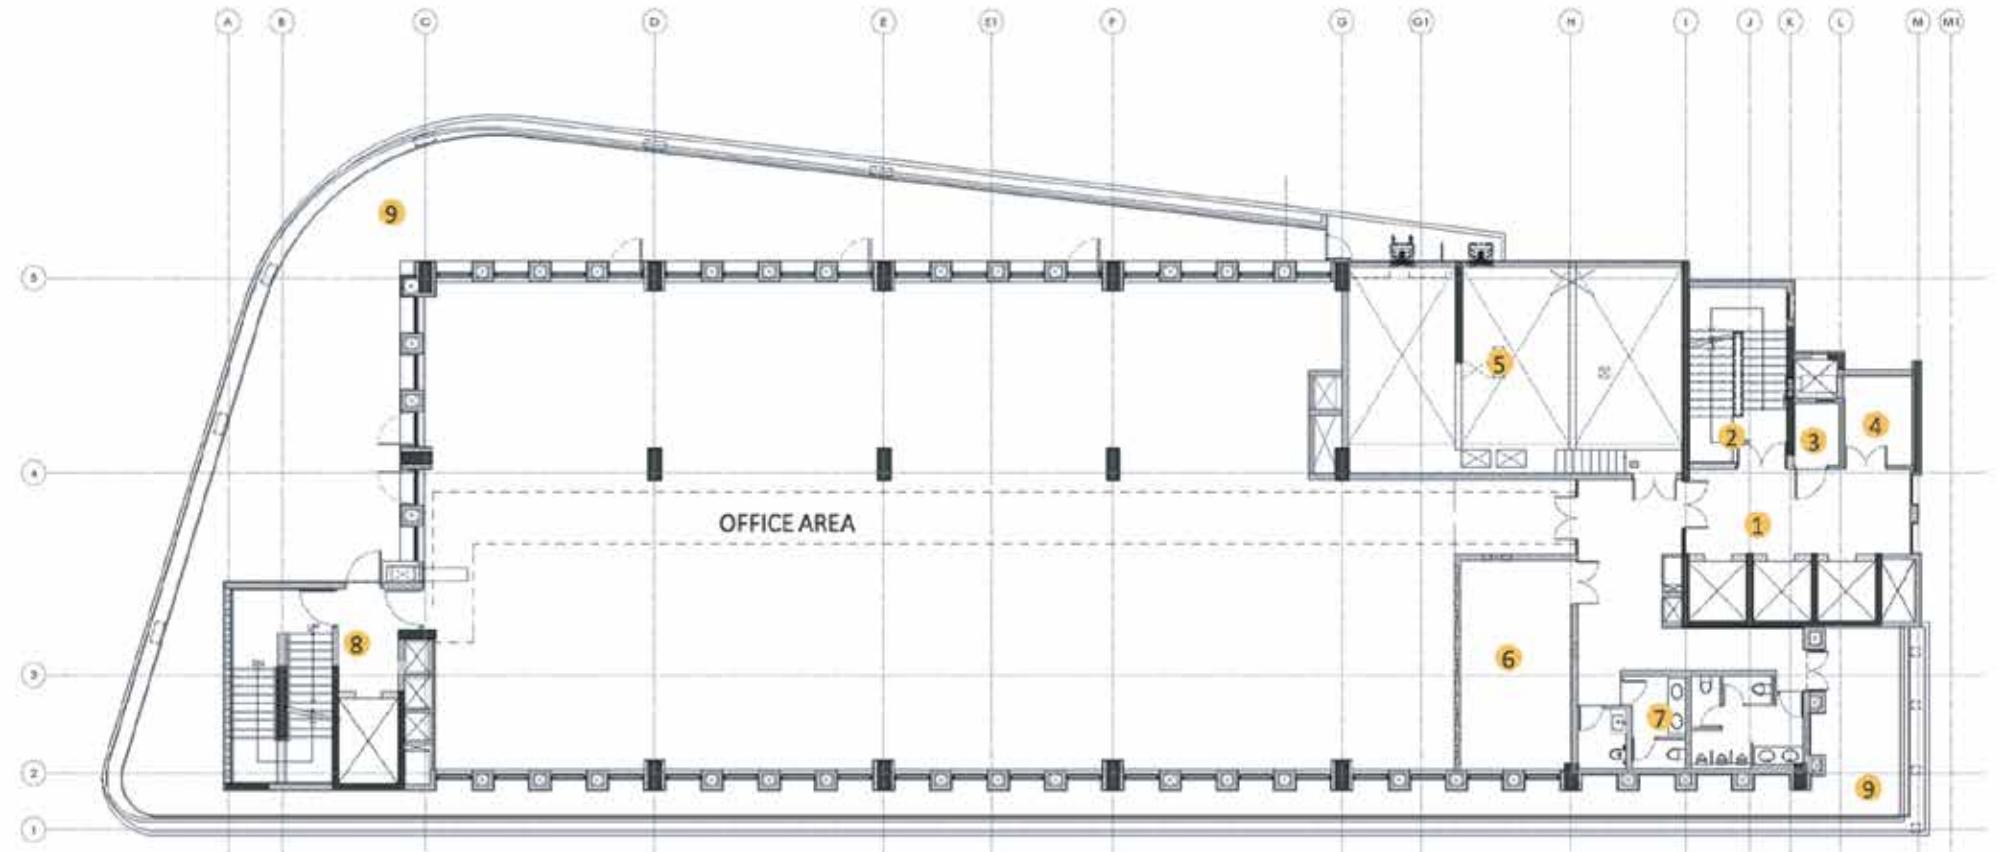

It is only natural, then, that the place where you spend most of your day provides you with a connection to the natural world.

From the unique glass fitted into the façade to the very air you breathe inside Max House, everything you experience is designed to enhance the effects of nature on creativity, productivity and wellness.

The three tier air treatment technology delivers air quality on par with global standards; complete with CO2 sensors used to optimize ventilation and circulation.
